

# Simplifying Routines, Bringing Our Solutions to Life

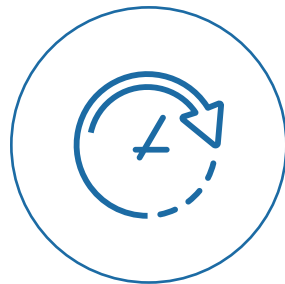

A member of UEM Group

Our experience at the front lines gave us insights to innovate and simplify routines in the new normal, to keep your people and assets safe and sound.

What are the basics of a **clean and safe workplace** to win your team's trust?

How do we ensure that teams can **work productively in the new normal** and go back to their routines?

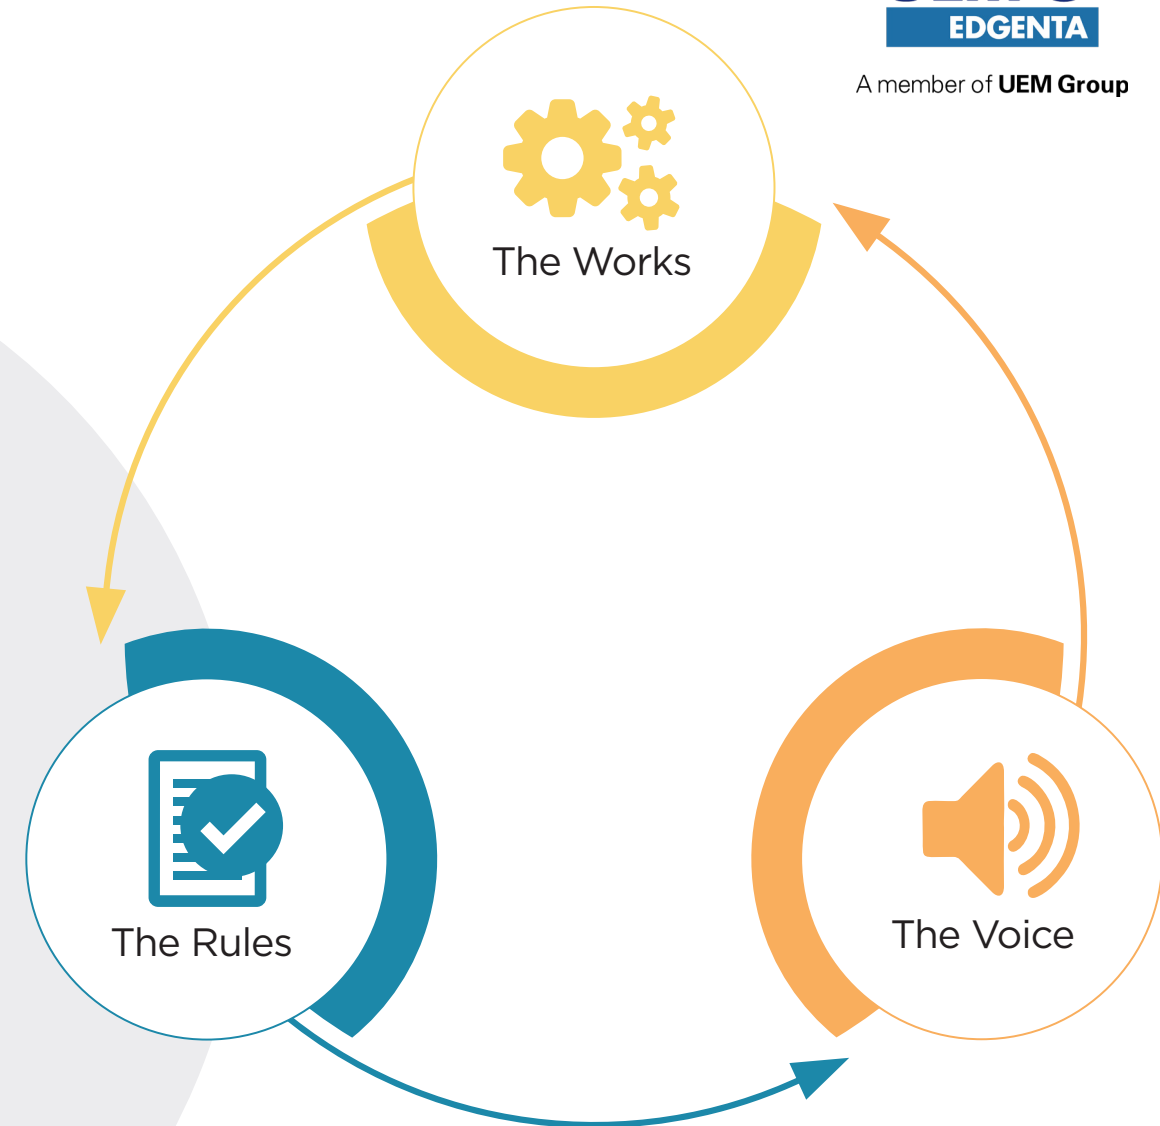

What are the **shared responsibilities** that our clients need to implement, for our methods to work?

At **Edgenta's Headquarters**, we embraced the new normal by implementing a perfect balance of solutions, procedures and communications to keep our people safe when returning to work, which has led to us being recognised by Bureau Veritas (BV), a global leader in testing, inspection and certification services for the application of new protocols and standards.

Edgenta's Headquarters in Bangsar South is the **1<sup>st</sup> corporate building in Malaysia\*** to be Safeguard certified by Bureau Veritas

*\*Certified for complying with the implementation of hygiene excellence and safety controls in the country as at November 2020*
