

UEM Edgenta Posts Q2 Recovery, Maintains Healthy Order Book

KUALA LUMPUR, 28 August – UEM Edgenta Berhad ("UEM Edgenta" or "the Company"), a leading Asset Management and Infrastructure Solutions company in the region, today announced its unaudited financial results for the first half of 2025, ending 30 June 2025 (1H FY2025), reporting a return to quarterly profitability after a challenging start to the year. UEM Edgenta recorded a net profit of RM11.2 million for the second quarter ended 30 June 2025 (Q2 FY2025), marking a strong recovery from the RM17.7 million net loss in Q1 FY2025. This turnaround was driven by stronger revenue of RM730.3 million, up RM84.2 million quarter-on-quarter, reflecting the ramp-up of deferred works and contributions from newly secured contracts across key segments.

In Q2 FY2025, the Asset Management segment posted a net profit of RM10.1 million, an increase from RM5.2 million in the preceding quarter, supported by higher revenue of RM485.8 million compared to RM464.8 million in Q1. The growth was underpinned by ongoing and new contracts in both domestic and international markets. Meanwhile, Infrastructure Solutions revenue rose significantly to RM246.2 million from RM180.9 million in Q1 as previously deferred maintenance works and project activities accelerated. The segment achieved a notable turnaround, delivering a net profit of RM13.0 million compared to a net loss of RM6.4 million in Q1.

For 1H FY2025, the Company reported revenue of RM1.38 billion, 4.2% decline year-on-year from RM1.44 billion, due to the flow-through impact of Q1 deferments. The Company recorded a net loss of RM6.5 million for 1H FY2025, compared to RM23.0 million net profit in the same period last year. Despite the softer 1H performance, UEM Edgenta remains focused on building momentum for the second half of FY2025. The Company is committed to strengthening its core businesses and delivering sustainable profitability, supported by a healthy order book, strategic contract execution, disciplined cost optimisation and improved operational efficiencies.

Moving forward in FY2025, the Company will continue to optimise operational activities across its project pipelines under a healthy orderbook to protect margins and improve efficiency, while accelerating the commercialisation of its integrated service and product offerings. The recent RM735.2 million hospital support services win in Singapore and the renewal of key contracts in Taiwan and the United Arab Emirates (UAE) underscore our ability to scale high-quality asset management solutions across international markets.

Back home in Malaysia, the award of an Integrated Facilities Management (IFM) contract in the minerals sector further highlights the versatility of our Asseto system in delivering cutting-edge capabilities such as CMMS, BMS, and Energy AI. Additionally, the appointment of UEM Edgenta's subsidiary, OPUS, for Network Maintenance Management (NMM) services covering non-pavement works such as slopes, bridges, drainage, and tunnels across several highways and infrastructure projects over the next three (3) years is a strong testament to market confidence in our specialised expertise and proven capabilities.

"Our ability to sustain a healthy order book in the first half of 2025 reflects the resilience of UEM Edgenta's business model and the dedication of our people. We remain focused on strengthening our core operations, optimising costs, and delivering sustainable value to our stakeholders. Recent wins from hospital support services in Singapore to key infrastructure and facilities management contracts in the UAE and Malaysia reaffirm our capability to deliver high-quality, innovative solutions across markets. With disciplined execution and the continued trust of our clients, we are confident in navigating the remainder of the year and positioning the company for long-term growth," shared Shaiful Subhan, Chair, Edgenta Management Committee.

UEM Edgenta is proud to share that in June 2025, the Company was officially included as a constituent of the FTSE4Good Bursa Malaysia Index (F4GBM). The F4GBM index measures the performance of publicly listed companies within the FTSE Bursa Malaysia EMAS Index for practices in Environmental, Social, and Governance (ESG) matters, against globally recognised standards. This Inclusion signifies our strong ESG practices and continued commitment to conducting business responsibly in Malaysia and markets we operate. This recognition further exemplifies our ability to deliver long-term value creation for our shareholders.

As part of the Company's strategic priorities, UEM Edgenta is also advancing its international business expansion by reinforcing its presence in markets including Singapore, Taiwan, the UAE and the Kingdom of Saudi Arabia. These markets present significant growth opportunities aligned with UEM Edgenta's capabilities and long-term vision. With a healthy order book and disciplined execution of its strategic priorities, UEM Edgenta remains well positioned to navigate market challenges, capture new opportunities, and deliver sustainable value in the second half of 2025 and beyond.
